

# Coolant Exchanger

## The Industry's Most Economical Coolant Exchanger

Tired of spending a fortune to service radiators? Then you'll love the new BSI Coolant Exchanger. It does as much and often more than other equipment, but at a fraction of the cost. It's quick, easy to use and versatile. Why pay more for less?

### 4 Operations In 1 Piece of Equipment

- Drains old coolant using a vacuum
- Eliminates airlocks
- Recharges with new coolant
- Tests for leaks while under vacuum

### New Features

New accessories for removing coolant from:

1. Engine Heads
2. Radiators without drainage plugs
3. Radiators with reservoir access only

- Pull continuous vacuum & fill at the same time
- Automatic shut-off when radiator or recovery pail is full
- Operates using shop air
- Unique design connects to all radiators
- Clean & compact

# Coolant Exchanger

## DOING MORE FOR LESS

Removal of coolant through surge tank.

Controlled release through lower radiator hose while pulling vacuum at top of system.

Removing coolant from engine heads by pulling a vacuum. This prevents coolant from mixing with and contaminating oil in cylinders.

## ELIMINATES AIRLOCKS

We all know it can be hard to remove airlocks from a radiator, especially on vehicles where the engine is higher than the radiator. With the BSI Coolant Exchanger we've solved this problem. Using our advanced technology, it's as easy as 1-2-3.

1. Connect shop air to the BSI Coolant Exchanger and pull a vacuum while reading pressures on the gauge.
2. Check for leaks while under vacuum.
3. After inserting the refill hose into your coolant container, watch your radiator fill within moments. When it is full, it will shut off automatically. No need to disconnect or reconnect hoses during this operation.
