(59 ml) Dye Cleaner, Plastic Carrying Case

- No dye loss – ever
- Never have coupler dye waste
- No messy spills

Easy-Fill Injector

Attach to low-side service port

Nothing Equals The Easy-Fill A/C Leak Detection System!

— THE PRICE LEADER —

AFFORDABLE, PROFESSIONAL, SIMPLE & CLEAN!

How It Works

1. Before connecting to low-side port, fill the EASY-FILL MULTI-SHOT™ injector by inserting STAY-BRITE dye.

2. With the A/C system off, attach the injector by placing the low-side coupling on the low-side port and have the hose face up.

3. Start the A/C system. You will see the clear hose being pressurized when the refrigerant bubbles through the liquid. The pressure differential moves the dye from the hose into the A/C system.

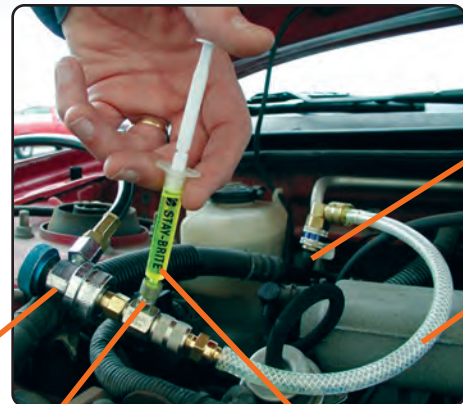

4. Disconnect the injector by removing the low-side coupling from the low-side port.

Easy-Fill™ works with your R&R Machine

Leave the Easy-Fill Pro Injector hooked up permanently to your R&R Machine.

When you want dye, inject it into the EASY-FILL PRO. If you don't want dye, don't inject it. It's that easy.

Injector connects to low-side port
